Look well face skin care

Duration: ca 1 hour

Target: All types of skin

PROCEDURE

Make-up removing (5 minutes)

Remove delicately the facial make-up with our make-up removing milk with sweet almond oil and almond milk. Its combination of almond milk and oil with softening and moisturizing* properties allows to remove delicately all make-up tracks.

For oily skin remove greasy excess with a swab of cotton wool tintured with Tonic lotion before starting the treatment.

Peeling (10 minutes)

Begin with a gentle scrubbing using the facial scrub with bamboo tears and peach milk. This foaming emulsion has to be applied all over the face with the help of a small brush or a damp sponge for more sensitive skin.

Gently brush the face in small circular motions, without applying pressure. Take care to avoid the eye area.

The finely crushed bamboo stems produce a 100% natural fine powder rich in silica and abrasive through mechanical action.

Silica is an essential element in promoting elasticity and suppleness in the skin tissues. Its action is reinforced by the presence of peach milk.

Rinse with lukewarm water and carefully dry the face before proceeding further. The skin is now free of all traces of impurities and ready to receive the very essence of the facial care.

Modeling (15 minutes)

Continue the procedure with a facial massage using our carrot oil (39%).

The massage relaxes the face and stimulates cutaneous microcirculation. It therefore helps penetration of the oil into the skin.

Carrot oil, rich in provitamin A (also called betacarotene), softens and promotes regeneration of the skin.

Its action is reinforced in this product by that of cypress essential oil which stimulates microcirculation, and of eucalyptus essential oil with its astringent and healing virtues.

This formula contains esters which reduce the greasy, sticky feel of carrot oil. It penetrates quickly and does not require rinsing before moving onto the next step.

Mask (15 minutes)

Once the skin is deeply cleansed, follow with the cleansing mask with green clay and extracts of green tea and aloe vera. Spread over the face in thick uniform layers, avoiding the eye area and let stand for 15 minutes (this cream-mask does not dry).

This product combines the cleansing efficacy of green clay with the remarkable moisturizing* virtues of Aloe Vera. It gently eliminates all impurities.

The tonic and regenerative properties of green tea bring a true sensation of comfort. It revitalizes the pores of the epidermis and the skin recovers its bloom and its softness.

Draw off the mask with lukewarm water and dry the face.

PRODUCTS

make-up removing milk

tonic lotion

facial scrub

carrot care oil

cypress essential oil
eucalyptus essential oil

cleansing mask

* moisturization of the upper layers of the epidermis

Cleansing (5 minutes)

Remove all oily remains with a swab of cotton wool tintured with tonic lotion composed of 98% of floral (rose, lavender, chamomile, witch hazel) and fruit waters (grapefruit and kiwi). This tonic lotion encompasses the astringent properties of the rose, purifying of the lavender and the chamomile, tonic of the witch hazel and energizing of the grapefruit and the kiwi.

This product can be used daily in the morning to cleanse and waken the face, before applying your cream.

tonic lotion

Stroking (10 minutes)

Lastly, apply the «look well» regenerating cream. It holds the properties of carrot oil combined with nourishing and softening wheat germ oil, and with grapefruit and kiwi waters so rich in vitamin and oligoelements.

This cream which suits all types of skin can become a genuine daily cream for repair and protection of the skin. It will protect it from the effects of outside pollution and will let it «look well».
